GURDEEP MECHANICAL WORKS

(An ISO 9001 : 2015 Certified Co.)

ABOUT COMPANY

Since its inception in 1996, the company has been following strict quality control measures as per the international standards to manufacture its range of machines. To conform to those standards, various quality control checks are applied at various production levels before final shipment, which is carried by a team of well experienced technicians and engineers.

With the sole aim of providing quality machines at competitive prices, the company is quickly gaining ground in the highly demanding overseas markets. Highly prompt services has led the company to enjoy an enviable reputation amongst its customers. The vast experience of key personnel at GMW has significantly helped the company to increase its share of the global market.

Our Admin Block

QUALITY ASSURANCE

Quality in everyday life and business, engineering and manufacturing has a pragmatic interpretation as the non-inferiority superiority or usefulness of something. GMW initiative towards total quality management by incorporating ISO and other standards specifications have allowed it to benchmark its existing operating and management practices with the best in the industry and establish itself as the supplier of choice by delighting its customers with its services and products.

We are specialized in equipments for hot and cold rolling mill plant. The process for manufacturing rolling steel in plants has been innovated by experts having colossal experience in developing these mills by international quality norms at our manufacturing facilities with our commitment to no settlement in quality, we employ various quality control procedures in conformation to the ISO certification.
